

Dear Parents/Guardians,

I hope this letter finds you well. As we prepare for the next academic year, I am writing to you today to recommend a particular calculator for your child when they join Saint Martin's. We strongly recommend that you purchase the Casio fx-83gtcw calculator for your child's use in the Maths classroom.

The Casio fx-83gtcw is an essential tool for our Maths curriculum. It is designed to aid students in performing various mathematical functions, including algebraic, statistical, and trigonometric calculations. It also has features that allow students to solve complex equations quickly and accurately, which is essential for our curriculum. They may not use many of these functions to begin with, but a good calculator like this will be suitable throughout their secondary education.

We would like to emphasize that this particular model is the latest in the range of Casio calculators and has some new features compared to older models. It has been specifically designed to meet the requirements of the new Maths curriculum and provides students with the essential functions required to succeed in their studies.

Furthermore, the Casio fx-83gtcw is a durable calculator that will last for the entirety of your child's secondary education if they look after it correctly. It comes with a protective case that will help to prevent any accidental damage and ensure that it remains in excellent working condition.

We understand that some parents may already have calculators at home, but we strongly recommend that you consider purchasing the new Casio fx-83gtcw. This will ensure that your child has access to the specific functions required for the Maths curriculum, and it will also help them to remain consistent in their Maths studies.

If you have any questions or concerns, please do not hesitate to contact me. We look forward to welcoming your child to our Maths classroom in the coming academic year.

Yours faithfully,

Nick Cassidy

Head of Maths
